SETH CORBIN

“Keeping my body healthy will allow me to enjoy my children to the fullest and be an active part of their lives”

I am a driven individual and have always lived an active lifestyle. My occupation for the past seven years has been in law enforcement. I find a challenge each day not knowing what lies around the corner. I look forward to living a long healthy life and I know to accomplish this I need to start with proper diet and exercise. Keeping my body healthy will also allow me to enjoy my children to the fullest and be an active part of their lives. Finding the help I needed at Arkansas Dental Health and TMJ Therapy Center has allowed me to work toward a healthier lifestyle.

I first suffered headaches in high school and became dependent on medication to function on a daily

basis. I quickly realized that the medication only masked the problem and decided to find treatment that would correct the problem instead of mask the symptoms.

Once I began treatment at Arkansas Dental Health and TMJ Therapy Center my headaches became almost non-existent. My quality of life has improved in many ways. Snoring and getting up numerous times during the night affected my sleep, which consequently took a toll on my performance the next day. This had gone unnoticed until my TMJ therapy. I am convinced that I would still be in pain and suffering if I had not gotten treatment for my TMJ disorder.
